

UI/UX Design with Figma - Hour 3: Introduction to Figma

Hour 3: Introduction to Figma - Practical Tools & Login Page Design

- Goal: Understand Figma's working environment and tools by designing a simple mobile login screen.

1. Quick Review: Figma Interface & Basic Tools

- Toolbar: Move, Frame, Shapes, Text
- Left Panel: Layers and Pages
- Right Panel: Properties (size, color, typography, layout)
- Shortcuts: R = Rectangle, T = Text, F = Frame

2. Understanding Pages & Layers

- Pages:
 - - Like tabs for organizing designs.
 - - Useful for separating wireframes, assets, and prototypes.
 - - Can be renamed or duplicated.
- Layers:
 - - Every shape or text is a layer.
 - - Order affects visibility.
 - - Group layers using Cmd/Ctrl + G.
 - - Use naming and organization for clarity.
- Best Practice: Group related elements and name important layers.

3. Figma in Practice - Login Page Design

- Objective: Recreate a mobile login screen using Figma.
- Elements to include:
 - - Frame (mobile size like iPhone 13)
 - - Title text: 'Welcome back!'
 - - Two input fields (Email and Password): rectangles with text labels
 - - Login button: rectangle with text and color styling
 - - Link text: 'Forgot password?'
- Alignment:
 - - Use alignment tools for centering and spacing.
 - - Recommended spacing: 16-24px
- Tip: Use Auto Layout for more consistent spacing (optional).

4. Task

- Student Task: Recreate the mobile login screen.

- - Encourage creativity in color, font, button style.
- Optional: Create a duplicate screen for 'Sign Up'.
